

Nevada Gaming Statistics: The Last Six Months

Trends for Casino Revenues, December 2016 to May 2017

This report collects top-line results for the past six months in five Nevada reporting areas. With this perspective, the current direction of a variety of sectors in the state's gaming market should be clear. In addition to statistics for overall, slot, and game revenues, it also includes year-to-year changes in each of those categories and slot hold, an important measure of value returned to gamblers, as well as the totals for the previous six months.

Executive Summary

Statewide, gaming revenues are up 2.71% for the past six months, with a 2.69% increase in slot win and a 6.69% gain in game win.

The **Las Vegas Strip** is lagging (+2.41% total win) the state as a whole, but it has more extreme variations in its monthly results, thanks to the volatility of baccarat. Slot win is up 2.93% for the period, while games are up 1.93%.

Downtown Las Vegas is up for the period (+14.06%), with a growing slot win (+6.14%) helped by a higher game win (+35.08%).

Washoe County's remains on the rebound, with a higher total win (0.84%) and slot win (2.24%), but a smaller game win (-4.94%)
