

Nevada Gaming Statistics: December Historical Comparison

Summary of 10-Year Revenue Trends

December was a flat month for Nevada gaming as a whole.

Statewide, casino win grew by 0.45%. Slot revenue increased by 5.93%, while slot handle grew at a slightly slower pace. Game and table win fell 6.88%, mostly due to weaker baccarat results.

Las Vegas Strip casino win declined by 3.25%. Slot machine win increased by 6.07% with handle increasing slightly and hold a bit more so. Game win fell 10.57%. Baccarat win was the major culprit, as it declined by 29.91%. Partially this was due to the hold percentage falling from 2016's unusually high 15.84% to a more standard 12.18%, but handle fell as well.

Downtown Las Vegas had another positive month. Total win grew by 10.02%, with an 11.34% bump in slot win due to higher handle and hold and an 8.15% growth in game win, which came despite a 5.36% drop in hold percentage.

On the **Boulder Strip**, a guide to the locals market, total win fell 0.88%. Paradoxically, slot handle grew by 3.39%, but a drop in hold percentage led to slot win falling by 3.99%. Game revenue grew by 14.05% due to higher hold.

Washoe County had, by contrast, a uniformly excellent month, with total win up 8.06%, slot win up 8.53%, and game win up 6.21%. Slot hold fell slightly, but all other indicators were up.

Tables for Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County follow.
