

## Nevada Gaming Statistics: February Historical Comparison Summary of 10-Year Revenue Trends

February saw decreases in gaming revenue across Nevada, with one exception.

**Statewide** casino win declined by 4.47%, in large part due to a 16.03% increase in slot hold. In February 2016, slot hold was an unusually high 7.80%, and in February 2017, slot mean reverted to a more typical 6.60%. Slot handle actually grew by 13.67%, so the decrease in hold negated a statewide increase in slot play—and then some. Games were down 4.43% despite a slight increase in hold.

**Las Vegas Strip** casinos saw a 4.97% decrease in total win. Here, lower hold led to a 4.95% drop in slot win despite a slightly higher handle. Game revenues shrank by 4.99% with baccarat win declining sharply (-20.78%).

**Downtown Las Vegas** posted a 2.22% increase in total gaming revenue, although slot win shrank 3.20%, again because of a decrease in hold rather than less play. Game win grew by an impressive 16.78%, a number made even more impressive by the fact that handle grew 30.81%, and it was only a drop in game hold that kept the win from growing more.

On the **Boulder Strip**, a 9.12% decrease in total win was caused by the convergence of a 9.01% drop in slot win and a 9.92% drop in game revenue. The slot drop was due to decreasing handle and hold, while games saw a higher hold percentage but lower handle and, therefore, win.

**Washoe County** saw total casino win decrease by 6.70%, with the 6.43% decline in slot win driven by lower handle, as hold remained constant. Game win shrank 7.73%.

Note: Game win figures are inflated for 2016 and beyond since they now include poker (did not previously).

Tables for Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County follow.
