

Nevada Gaming Statistics: June Comparison

Executive Summary of 10-Year Revenue and Handle Trends

This report compares monthly Nevada gaming results for June over the past ten years for selected reporting areas: Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County.

June 2017 was a mostly flat month for Nevada gaming, with small variations in most reporting areas.

Statewide, overall revenues rose by 0.90%. Slot win was flat, with a decrease in hold mostly canceling out an increase in handle. Game revenues were also flat, with the same pattern: lower hold mostly canceled out higher handle. More money was wagered, but casinos only won slightly more than they did last year.

On the **Las Vegas Strip**, total gaming win was up 1.65%. Slot win increased by 4.99%, with the increase in hold outpacing the increase in handle. Game win rose by 2.55%. The unusually high baccarat hold of June 2016 regressed to the mean (10.48%, well within the typical range if a bit low), leading to a 15.58% decrease in baccarat win despite a higher handle.

Downtown Las Vegas saw overall win grow by 8.72%. Slot win fell by 622% despite slightly more play, thanks to a lower hold percentage. Game win, however, increased by 55.34%, mostly because of higher handle (+36.53%) and hold (+13.78%).

The **Boulder Strip**, a guide star for local Las Vegas play, was down, with total win dropping by 15.14%. The chief culprit was a drop in slot win (-15.94) that happened because of a lower hold percentage, as handle increased. Game win decreased by 7.85%.

Washoe County saw a 1.73% overall gain in win thanks to higher slot win, slot hold, and slot handle. Game win fell by 14.74%, with a lower hold and a lower handle the culprits. Casinos kept a smaller percentage of less play in June 2017/

Tables for Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County follow.
