

Nevada Gaming Statistics: June Comparison

Executive Summary of 10-Year Revenue and Handle Trends

This report compares monthly Nevada gaming results for June over the past ten years for selected reporting areas: Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County.

June 2015 demonstrated that dependence on high-end play—baccarat in particular—can be a dangerous game. The Las Vegas Strip, which gets a large percentage of its total win from baccarat, suffered this month as baccarat play fell; other parts of the state, not so beholden to the game, performed well.

Statewide, overall revenues rose by 6.8-% due to higher slot and baccarat holds and a slightly higher slot handle. Total game handle fell by 1.56%, and a higher overall hold increased revenues by 13.00%. Slot win was 6.95% up.

On the **Las Vegas Strip**, total gaming win was up 9.74%, again due to higher slot hold (+9.81%) and baccarat hold (+50.80%). Baccarat handle actually fell by 12.33%, but the higher-than-average hold allowed for a 22.16% growth in win.

Downtown Las Vegas had a flat month, with total win up 0.56%. Slot win increased by 5.51% (almost entirely due to higher hold) while game win declined by 8.81%. Game handle was up an impressive 14.08%, but a 20.07% drop in handle led to the dropoff in win.

The **Boulder Strip**, a weathervane for local Las Vegas play, was similarly flat (down 0.10%). Slot win declined in spite of higher handle because of a lower hold percentage. Game win increased by 14.02%, due mostly to a higher hold percentage.

Washoe County saw a 4.10% overall gain in win thanks to higher slot win, slot hold, slot handle and game win, hold, and handle. Overall this was a month with more of everything for Washoe casinos.

Tables for Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County follow.
