

Nevada Gaming Statistics: May Historical Comparison Summary of 10-Year Revenue Trends

May was an up month for Nevada gaming, with revenue increases in most reporting areas.

Statewide casino win increased by 3.50%, with a 2.72% increase in slot win and an even 5% jump in game win. The game win was driven by substantially stronger baccarat results on the Strip (see below). Slot handle was up 2.28%, pointing to a greater volume of gambling in the month.

Las Vegas Strip casinos fared slightly worse than the rest of the state, with an overall 2.97% growth in win and a 0.06% increase in slot win. Slot handle was up but win percentage was down. Games were up 5.92%, mostly because of the 11.95% increase in baccarat win. Baccarat was helped by a slight bump in hold and higher handle numbers.

Downtown Las Vegas outperformed the Strip and the state as a whole, with a 9.54% overall win increase. Slot revenue increased only 2.41% thanks to a small decline in hold, while table win grew a whopping 35.56% despite a 15.07% drop in hold percentage. Table play is growing rapidly Downtown.

On the **Boulder Strip**, a large portion of the locals market, overall win grew by 3.14%. Slot win, the dominant revenue source for this reporting area, grew 4.13% despite a slight decline in handle. Game win fell 6.58% despite a slight increase in handle.

Washoe County had nearly flat revenues—a slight overall increase resulted from a 2.87% growth in slot win and 11.57% drop in game win.

Note: Game win figures are inflated after 2016 since they now include poker (did not previously).

Tables for Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County follow.
