

UNITED STATES COMMERCIAL CASINO REVENUES

STATES WITH COMMERCIAL AND RACETRACK CASINOS, 2001-2015

CENTER FOR GAMING RESEARCH, JUNE 2016

Executive Summary

Since 2001, nine new states have begun offering commercial casino gaming. This report tracks the annual calendar year revenue totals for all commercial casinos states since 2001. To assist in the understanding of the impact of competition on states with mature industries, it includes two tables with national totals and tables breaking the states up into four regional groups: West, Midwest, South, and Northeast. This report also has tables showing the gaming revenue of each state as a percentage of the regional and national totals.

Examining the data, it all regions have had growth during this period. Overall, the most impressive growth has been in the Northeast, with the South gaining the least. This growth, however, has not been uniform: four of the 15 states that had commercial gaming in 2001 have seen decreased revenues between 2001 and 2014, and 10 out of the 20 states with gaming in 2007 have seen declines since that year. Overall, gaming win for the selected states has grown by over 40% since 2001, and has surpassed pre-recession levels

Notes and Definitions

Unless noted, all data taken is from state regulatory sources for the calendar year in question. All totals in thousands of dollars.

Illinois and Louisiana totals do not include video gaming not conducted in casinos or at racetracks.

West Virginia data for 2001/2002 is fiscal year; data for 2003-2012 is taken from the American Gaming Association's *State of the States* reports.

New Mexico and Missouri data for 2001-2012 is taken from the American Gaming Association's *State of the States* reports.
