

Nevada Gaming Statistics: February Historical Comparison Summary of 10-Year Revenue Trends

February saw an increase in gaming revenue across Nevada, with a notable exception.

Statewide casino win grew by 7.65%, with slot win up 4.11% and game win up 13.30%. Slot hold was up only slightly and game hold was down, so the increase was due to higher levels of play.

Las Vegas Strip casinos saw an 11.37% bump in total win, with a 2.86% jump in slot win (despite a lower hold percentage) and an 18.62% increase in game win, which was due to an 82.53% rise in baccarat win, which was in turn due to Chinese New Year falling in February rather than January this year.

Downtown Las Vegas posted a 2.84% increase in total gaming revenue, with slot win growing 8.21%, mostly because of higher hold. Game win shrank by 9.11%, with hold percentage and handle both lower.

On the **Boulder Strip**, a 1.03% decrease in total win happened despite a 1.31% growth in slot win because game win fell by 17.64%. Game handle declined slightly, and the chief culprit was likely the lower hold percentage.

Washoe County saw total casino win grow by 5.60%, with the 10.06% jump in slot win driven by higher hold and handle. Game win shrank 11.83%.

Note: Game win figures are higher for 2016 and beyond since they now include poker (did not previously).

Tables for Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County follow.
